Corrections

On pages 422–3 of the July 1987 issue of the JRSM, in the article 'Adrenal suppression following low-dose topical clobetasol propionate' by EM Ohman *et al.* it is stated that 0.5% clobetasol propionate cream was used in Cases 1 and 2. This should read: 0.05%.

On page 735 of the December 1987 issue of the JRSM, in the article 'An aetiological approach to the law' by Sir Roger Ormrod, the maximum permitted level for drivers' blood alcohol should have read: '80 mg/100 ml'.
